18 DEC 86

SESSION SUMMARY

SITE: DRESDEN, DDR

.....although the basic gestalts of the site were very evident, details were few and far between. There was a lot of AOL matching with this site. The event of 1941 was very vivid and clear, but overlaid onto London England. The feeling of steel, manufacturing, smoke and air pollution was very strong in present time. The site was definitely a European ^{city} and situated on a river.

Stage IV is coming along slowly, but it's coming along.
